V3.5-11-2014

Our special machine department can satisfy any request with solutions that you won't find in our standard catalogue.

90% of these machines capitalize on our knowledge of cutting, bevelling or orbital TIG welding systems.

Areas of application vary, and include:

- specific machines for cutting thin titanium
- machines for cutting tubes on plates for the nuclear industry
- remote-controlled machines for disassembly of piping in the nuclear industry
- cutting machines for manufacturing: complete and fully automated line
- carbide orbital cutting machines for manufacturing Ø super-compact welding heads
- etc.

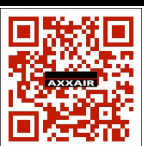

Semi-automatic **TITANIUM** cutting line

Orbital cutting line for Big Diameter/thin wall **TITANIUM** tubes
